AI AT WORK

A 30-page report lands on your desk an hour before the meeting.

THE PROBLEM

Why this is worth five minutes

A summary is only useful if you can check it against the source.

STEPS

Summarise a long document without losing the detail that matters

1. Paste or upload the document if your organisation allows it for this tool.
2. Ask for a summary with the section or page each point came from.
3. Open the original at those points and confirm the three that matter most.

THE PROMPT

Copy it, then change the [brackets]

```
Summarise this document in 8 bullet
points for a busy manager: [paste
text]. After each point, give the
section heading or page it came from.
Then list 3 questions the document
does not answer.
```

CHECK BEFORE YOU USE IT

Never skip this part

- Check the three most important points against the source.
- Look for numbers: confirm each one in the document.

MISTAKE TO AVOID

Trusting a summary of a document you have not opened.

Do not paste customer or company data into an AI tool.

KEEP THIS

Save it for the next time you need it.

Summarise a long document without losing the detail that matters
